***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-11, drawn to a method for delivering a specific version of a test, classified in class 707, subclass 203.
- II. Claims 12-29, drawn to a method and system for delivering a test to a student, classified in class 434, subclass 323.

2. The inventions are distinct, each from the other because of the following reasons:

The inventions are distinct each from the other because inventions I-II are prima facie independent and distinct inventions due to their recitations of distinct and specific structures. The invention of Group I is drawn to a method which includes the steps of detecting which version of a test is stored in a test center database. This feature is not present in the other invention. Invention II is drawn to a method for the delivery of a test to a student including storing the test at a test center and delivering the test questions to a student. These features are not present in the other invention. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
